PERSONAL PROJECTS

Shopping List   https://shlist.netlify.app/

- A front-end-centric full stack React & Express.js application actualizing an already made design (Figma). It allows to create and save shopping lists, to review shopping history and statistics.
- I used Redux (Redux Toolkit approach) for complex state management and a relational database management system (SQLite) for storage.

Yours Next   https://yours-next.herokuapp.com/#/

- A full stack MongoDB, Express.js, Vue.js, Node.js application that allows to create groups with shared playlists stored in the database, to watch Youtube videos separately or in a synchronized manner among group members and to chat and get other real-time updates via Socket.io.
- I also practised utilizing various 3rd party APIs.

Up-up   https://up-up.herokuapp.com/

- A full stack MongoDB, Express.js, React, Node.js application that allows authenticated and unauthenticated users to vote in polls while authenticated users are allowed to create polls and to manage their profile information and polls.
- Poll results are represented in a D3.js chart.
- I took various measures to increase app security.
- This app was also my playground migrating from JavaScript to TypeScript and starting using React hooks.

Image Uploader   https://imago-uploader.netlify.app/

- A responsive React & Express.js app that allows to upload images with removed EXIF data.
- I practised file upload, drop events, used browser Clipboard API.

Cat Wiki   https://cats-wiki.netlify.app/

- A responsive React & Express.js app that fetches information about cat breeds from CatAPI and keeps track of the most searched ones.
- I improved my skills regarding responsive design, images, and TypeScript.

EXPERIENCE

Intern
Vaikų ligoninė, VŠį VUL Santaros klinikų filialas, VUL santaros klinikos, VŠį Vilniaus miesto klinikinė ligoninė
Feb 2018 – May 2018

- Documented patient care, educated patients on their diseases/disorders, aided patient assessment, improved teamwork skills by assisting surgeries.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3, Sass
Front-end libraries/frameworks: React, Vue.js, D3.js,
Back-end frameworks: Express.js
State management libraries: Redux
Testing libraries/frameworks: Jest & React Testing Library, Mocha & Chai
Database management systems: MongoDB & Mongoose, SQLite
Other: Webpack, Babel, Git (GitHub), Node.js

EDUCATION

Medical Doctor, Master's Degree in Medicine
Vilnius University, Vilnius
Sep 2012 – Jun 2018

CERTIFICATES

Legacy Full Stack
FreeCodeCamp
Sep 2018 – Dec 2019

Scientific Computing with Python
FreeCodeCamp
Jun 2021
